BAR · 1 kg ingot · brown glass · FULL SIZE 1:1

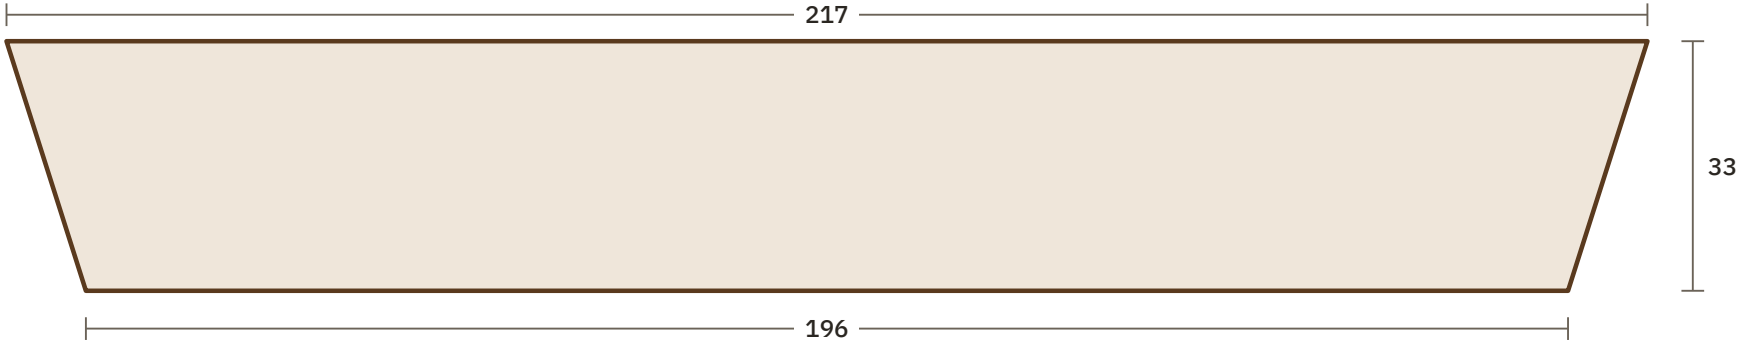

All dimensions in mm, finished glass. Density taken as 2.5 g/cm³.

GLASS
BOSA

PLAN · TOP FACE (OPEN FACE OF THE MOULD)

SIDE

All four sides lean in by 10.5 over the 33 height (about 17.7°), so the bar releases from the mould.

Mass 1,000 ± 5 g · volume ≈ 400 cm³ · edges and corners rounded r 2 · brown cullet, coarse grade.

The height is set by the weight of glass loaded: make the mould cavity about 36 deep.

End view (68 over 47, 33 high) is on sheet 2.

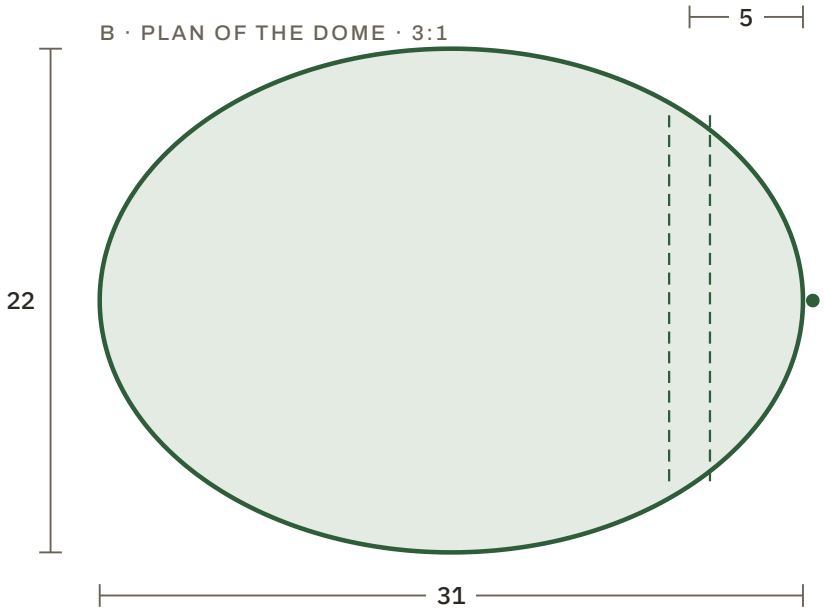

Print at 100 % (no "fit to page"): this bar is 100 mm

B · 10 g half olive · green glass · and BAR end view

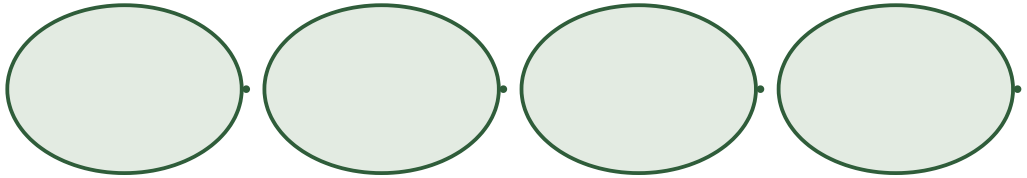

All dimensions in mm, finished glass. The B is drawn 3:1 on the left and full size on the right.

GLASS BOSA

B · PLAN OF THE DOME · 3:1

B · FULL SIZE 1:1

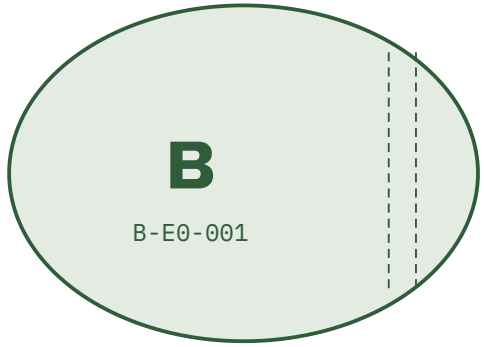

four B = 40 g · one hundred B = one BAR

side, full size

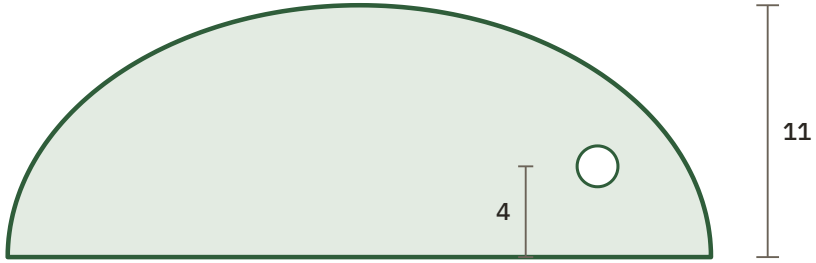

hole runs across, 16 long

FLAT BACK · 2:1

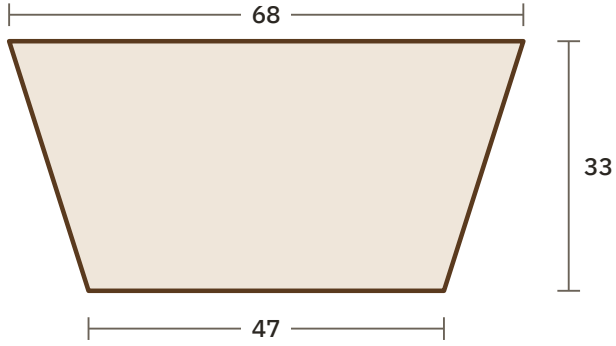

marks kept clear of the hole (dashed)

B · SIDE · 3:1

BAR · END VIEW · 1:1

Flat back = open face of the mould: the B mark and the serial are sandblasted on it.
Hole Ø 1.5–2 (drawn 1.8), cast in with a ceramic pin, about 3 of glass above and below.

Mass 10 ± 0.2 g (weighed after the hole is made) · volume ≈ 4 cm³
Half ellipsoid 31 × 22 × 11 deep · green cullet, fine grade
Olive mould: cavities at least 10 apart.

Print at 100 % (no "fit to page"): this bar is 100 mm
